

A Hair Dressing

Nearly every one likes a fine hair dressing. Something to make the hair more manageable; to keep it from being too rough, or from splitting at the ends. Something, too, that will feed the hair at the same time, a regular hair-food. Well-fed hair will be strong, and will remain where it belongs—on the head, not on the comb!

The State Tax Board have fixed the ad valorem tax at 12 1/2 cts on the hundred, this being the lowest in years. It was 20c last year.

The school per capita of six dollars for the next scholastic year is good news, and the largest apportionment ever made in the history of the State.

Wm. Dean Howells says that it is a crime to take money for writing poetry. It would be a crime to pay money for a good deal of it that is written.

The striking telegraphers may interfere with the mercantile business of the country, but the telegraph public patience if they interfere with the transmission of the box-scores.

Constable Mitchell says he is kept busy arresting men for whipping their wives. Wife beaters should be sent to the penitentiary—Cass County Sun.

We advocate the whipping post for wife beaters. Give them a dose of their own medicine. This will cure them.

The Supreme Lodge United Beneficent Association met at Fort Worth Aug. 14th. The meeting was harmonious. The order is in a prosperous condition and is attracting business men. It furnishes gilt edge insurance at reasonable rates, and is a home institution.

Omaha Canning Company shipped its first car of tomatoes and peaches last Monday. It was sold to Texas Produce Company and brought over \$1100. Another car will be loaded in a few days.

The above from the Omaha Breeze will prove that a canning factory is a paying proposition and Jefferson should have one by next season.

The initial number of "The Glad Hand," the official organ of Texas Five Million Club, is just out. It is published at San Antonio semi-monthly, price \$1.00. It is a neat little journal and says: "The Glad Hand will be circulated solely among people who are interested in the opportunities afforded for labor in the Lone Star State." May it be successful in what it undertakes.

The latest statement regarding the \$29,000,000 fine against the Standard Oil Company is that if the State of Illinois is sustained in the Appellate Court, it will collect the money by confiscating enough refineries to cover the bill. This opens up an interesting vista of possibilities. It is hardly possible that the government will go into the oil refining business, and if it should merely seize the refineries and close them down, it would limit the supply of oil and put up the price to the consumer. All this unearned increment would go into the pocket of the Standard Oil Company, and the last state would not be much better than the first. Levying on the refineries does not look to the layman like a good scheme. Possibly John D. was right and Judge Landis will be dead a long time before that fine is paid.

THE TELEGRAPHERS STRIKE.

It is well the strike came off in mid-summer while business is comparatively dull. Yet it is even annoying and is in a measure retarding a certain class of business. If the telegraphers undertake to close up every office and make the strike a complete shut off of commercial business, which is very questionable, they but hasten the day when the commercial interest of the country will demand that the National Government take charge of and operate all telegraph lines, as the postoffice is now done. Not a postal clerk would so much as think of striking, if he was not satisfied with his job he would very respectfully resign. It will be the same way when the government assumes control of all telegraph lines. Such strikes as are now going on will hasten the government control of all commercial telegraph lines. The government permits no foolishness, nor monkeying. It is to be feared that necessity will force the government to operate the railroads if unwise and uncalled strikes are continued. No one believes the National Government can operate either the telegraph or railroads as cheaply as they are now done, yet to prevent serious disturbances in the commercial world these chances may have to be taken rather than have the commercial world disturbed by strikes, thus keeping it in an unsettled and unsatisfactory condition. It is seldom that a strike benefits the strikers. Strikes have cost the strikers perhaps more than they have gained. It is an admitted fact that when a person is idle any ready cash he may have soon goes. Every person, single or unmarried, has certain fixed charges which must be met, salary or no salary. When the cash balance is exhausted then the question will be, what will be done when the rent comes around, or the grocery bill is due. Water and wind are the only free things man gets—an admitted thin diet, judgment and serious consideration should control all gatherings, especially when strikes are being considered. No striker has a right to say no one else shall take his place. This is an infringement on personal liberty. He has a perfect right to quit his job and go and do as he pleases so long as he does not undertake to infringe or trespass on the rights of either the company or any one who wish to take his place. Impulsiveness gets a great many into serious trouble. Wherein had coolness and calm consideration prevailed conditions would have been much better. A man with an entire wheat field back of him has a better showing for bread than the one with a barren field at his back. Again, every strike cost some promising young man heavily. His company may have him marked for rapid promotion. They may figure that some day this promising young man may be near the head of the company. Not so after he has joined the strikers. The company at once question his ability to make a nice discrimination at a critical time. He is therefore dropped and his name taken off the promotion book. His promotion thus comes up against a rock wall.

School Apportionment.

Austin, Aug. 20.—(Special)—The state board of education today declared an apportionment of \$6 per capita from the state available school funds for the next scholastic year, the total of the apportionment amounting to \$5,989,846.

The scholastic population of the state for the year beginning Sept. 1, 1907, and ending Aug. 31, 1908, is 883,441. The scholastic population of the state for the year 1906-07 was \$69,864, which makes the scholastic population for the year beginning Sept. 1, 1907, 23,577 more than last year. The apportionment as made will exceed the apportionment of last year \$1,011,326. Only three times in the history of the state has the per capita apportionment exceeds \$5.

Arabs Again Attack French.

Casa Blanca, Aug. 20.—The Arabs have delivered another attack upon the French forces under Gen. Druide, encamped outside the town, but were routed with heavy losses. A general uprising of the natives is expected. The European residents of the coast towns, as well as those who live at Fez, Morocco City and other places in the interior, are leaving their homes and seeking safety in flight.

PACIFIC FLEET OF CRUISERS.

New York, Aug. 21.—After six days at Yokohama, the first division of the Pacific fleet of cruisers, the Pennsylvania, West Virginia, Maryland and Colorado Rear Admiral Dayton commanding, will leave early to-morrow under orders to proceed to the West Coast of the United States, via Hawaii, where it is anticipated it will remain ten or fifteen days.

Quarter Million Dollars Stolen.

Lincoln, Neb., Aug. 20.—Three registered mail sacks, containing about a quarter million dollars, disappeared from a Burlington train between Denver and Oxford, Neb., Sunday night, and postoffice officials have just made the theft public. The train left Denver with seven sacks and but four remained when discovered. Detectives and postoffice officials are at work on the case.

LATER.

Chicago, Ill., Aug. 21.—The police are working on a clue in connection with the \$250,000 mail robbery Sunday on the Burlington Route. A bulky package, it is known, was mailed to Chicago from near Denver shortly after the robbery. The police have the name of the man to whom it is addressed and claim he is such a person as would be chosen as an intermediary for the thieves. There is nothing definite yet in the story.

A Correction by Judge Grubbs.

Greenville, Aug. 22.—Judge V. W. Grubbs, late President of the Farmers' Union National Board of Industrial Education, denies that he resigned his commission and withdrew from the union because of the adoption of a resolution at the instance of Messrs. Terrell and Mayfield, rabid enemies of Senator Bailey in the 30th Legislature, although he very much disapproved of such action. He gives as his principal reasons that his educational work on behalf of the organization was not appreciated by the membership and that it was completely under the domination of a few political schemers and unscrupulous grafters.

Indications Good For Oil.

A special from Atlanta, Texas, to Dallas News Aug. 22nd, says: "The Sulphur Oil Company, of which F. M. Greene of this city is president, is sinking a well on Sulphur River, ten miles northwest of this place. They are down about 600 feet. Indications are good for oil and gas. This company has applied for a franchise to furnish gas to Atlanta. The franchise passed to first reading at the meeting of the City Council."

EMPLOYMENT QUESTION ABSOLUTELY SETTLED

Any well informed man will admit the demand for honest, energetic young men and women, well trained with a thorough, practical and extensive course of bookkeeping, business training, shorthand, typewriting, telegraphy, station work, business arithmetic, rapid calculation, commercial grammar and business correspondence, business law, spelling and writing, is far greater than the supply. If this be true, what have we to do to place every graduate in a good position? First, we must give the course of training the business world demands. Second, we must convince the business public that we are giving such a course. Third, we must have a thoroughly organized employment bureau, through which we can keep in touch with the demands of all the large business offices throughout our various towns and cities. We have all these requirements and can place the right man in the right place when his course is finished.

A young man 18 years of age, a few days ago finished his course, was immediately placed in a good position at \$70 per month. He had not been earning \$25 per month before taking his course. His brother, who is much older, also completed our course of bookkeeping and shorthand, and was placed thru our employment bureau at an \$80 position. We could give hundreds of similar instances. A young lady who was clerking in her brother's store at \$6 per week was told by her people that she would make a mistake to quit her position to take a course with us. She did not see it that way, her ambition was above \$6 a week. She took our course, and in a few months was drawing \$85 per month, working shorter hours, and at easier work.

Young man, young woman, if you are honest and industrious and will take a course with us, we can place you in a good position just as soon as your course is finished. There is no doubt about it. If you were here, where we could show you our employment files and records, we could convince you in less than a minute's time. Make your arrangements to enroll with us at 182 page catalog, write for it. Address Tyler Commercial College, Tyler, Texas. This catalog is full of facts regarding the success of our graduates, our practical and unequalled department of telegraphy, the famous Byrne Simplified Shorthand and Practical Bookkeeping. Read the guarantee made on page two.
